

Professional Summary

Front-End Developer with experience in web interface development, UX/UI, and Shopify eCommerce. I have developed and maintained storefronts for a clothing brand using Shopify Liquid, HTML, CSS, and JavaScript, building pages from scratch and customizing templates according to each collection's needs. Experienced in updating catalogs, landing pages, product sections, and visual purchase flows every two months, aligning design, performance, and business goals.

Education

- UX/UI Designer

EBAC — Escuela Britanica de Artes Creativas

2025 – Present
- Systems Engineering

Universidad Politecnica de Queretaro

2019 – 2022

Experience

- Freelance Web Developer

Consejo Ciudadano para la Seguridad y Justicia de la CDMX

Dec 2025 – May 2026

Queretaro, Mexico

– Worked on a monolithic Laravel architecture, improving the user experience across both the public website and the client's administration panel.

– Fully redesigned the website interface by applying UX/UI principles, improving information architecture and overall user experience.

– Implemented new functional modules: training section, newsletter editor, and AI-powered automatic news translation system.

– Designed and implemented a newsletter pagination module and a database-connected search system.

– Developed a private administration panel for two-phase email monitoring with restricted access.

– Technologies: Python, HTML, CSS, JavaScript, Laravel, MySQL, Node.js.
- Shopify / Front-End Developer & Founder

M3mento — Streetwear Clothing Brand

Aug 2024 – Present

Queretaro, Mexico

– Develop and maintain Shopify storefronts for a clothing brand, working with Shopify Liquid, HTML, CSS, and JavaScript.

– Build pages from scratch and customize Shopify templates for launches, drops, and new collections.

– Update the online store every two months according to collection changes, including product pages, visual sections, banners, landing pages, and promotional content.

– Configure and organize catalog, products, collections, pricing, images, and navigation structure within the Shopify admin.

– Implement UX/UI improvements focused on visual clarity, navigation, conversion, and mobile shopping experience.

– Optimize loading speed, visual hierarchy, and front-end structure to improve performance, basic SEO, and user experience.

– Create graphic and 3D assets using Figma, Photoshop, and Blender for digital campaigns, landing pages, and brand content.

– Reduced bounce rate by 5% through navigation improvements, homepage design updates, and better product presentation.

– Technologies: Shopify, Shopify Liquid, HTML5, CSS3, JavaScript, Figma, Photoshop, Blender, Git/GitHub.

Projects

- DUSK — Mobile Training and Nutrition App

Premium offline-first app for athletes with running, gym, and nutrition tracking.

2025 – Present

– Built an offline-first architecture with Zustand + AsyncStorage and background bidirectional synchronization with Supabase PostgreSQL.

– Developed a Running module with high-precision GPS, background tracking, and Live Activities / Dynamic Island support for iOS.

– Built a Gym module with weekly routine creation and automatic total lifted volume calculation.

– Developed a Nutrition module with macronutrient logging integrated with USDA and Open Food Facts APIs.

– Technologies: React Native, TypeScript, Expo SDK 54, NativeWind, Zustand, Supabase, Swift/SwiftUI.
- WisEcho — Accessible Social Network for Older Adults

End-to-end UX project focused on WCAG accessibility for the senior market.

EBAC, 2025

– Led heuristic analysis and accessibility benchmarking against competitors.

– Defined users and stakeholders through simulated interviews and insight identification.

– Designed a Business Model Canvas proposal focused on accessibility and simplicity.
- Nescafe Challenge — Digital Recipe MVP

Product project based on Lean UX methodology, SMART goals, and quantitative validation.

EBAC, 2025

– Applied Lean UX to validate key hypotheses: +15% consumption increase and +10% morning relevance.

– Designed the “Nescafe Recipe Book” web/app MVP focused on viral content and cold recipes.

– Defined quantitative and qualitative metrics to validate the solution.
